com/alibaba/com/caucho/hessian/io/**BasicDeserializer#readLengthList**

```
@Override
public Object readLengthList(AbstractHessianInput in, int length)
    throws IOException {
    // refer to thrift default length limit
    // can also set length limit according to the configuration file
    if (length > 1024 * 1024 * 10) {
        throw new RuntimeException("array is too large");
    }
    switch (_code) {
        case BOOLEAN_ARRAY: {
            boolean[] data = new boolean[length];

            in.addRef(data);

            for (int i = 0; i < data.length; i++)
                data[i] = in.readBoolean();

            return data;
        }
        ...
    }
}
```
